MOC-2023-0015: Discontinuation of SU-8 2000 Product Line

Dear Valued Customer,

Please accept this formal notification of Kayaku Advanced Materials' discontinuation of the SU-8 2000 epoxy-based photoresist series.

The decision to discontinue the SU-8 2000 series is due to increasing supply chain difficulties in securing raw materials required to maintain the long-term supply of products that meet the same quality standards. We estimate that based on current availability of these raw materials and historical, customary order volumes, KAM is positioned to take orders through early-2025, with delivery of the SU-8 2000 products concluding in late-March 2025. (Subject to change.)

KAM's SU-8-based photoresist portfolio provides several alternatives for consideration. We recommend the following alternatives for your application:

<b>Current Product</b>	<b>Target Coat Thickness</b>	<b>Recommended Product</b>
SU-8 2010 or less	$\leq 10 \mu\text{m}$	SU-8 3000 or SU-8 TF 6000 series
SU-8 2010 through SU-8 2050	$10 \mu\text{m} \leq x \leq 50 \mu\text{m}$	SU-8 3000 series
SU-8 2075 or greater	$> 50 \mu\text{m}$	SU-8 XFT75 & SU-8 XFT100

Kayaku Advanced Materials invites you to contact us or any of our global distribution partners for assistance in choosing the right alternative SU-8 material for your process.

Regards,

A handwritten signature in black ink that reads "Alex Rutfield".
