#### 4 First-aid measures

- · Description of first aid measures
- · General information: Immediately remove any clothing soiled by the product.
- After inhalation:
- Supply fresh air. If required, provide artificial respiration. Keep patient warm. Consult doctor if symptoms persist.
- · After skin contact:

Immediately wash with water and soap and rinse thoroughly.

- If skin irritation continues, consult a doctor.
- After eye contact:

Wash eyes immediately with a large amount of water or normal saline, occasionally lifting upper and lower eye lids until no evidence of chemical remains (about 20 minutes). Remove contact lenses if present and easy to remove. Seek immediate medical attention.

· After swallowing:

Do not induce vomiting unless instructed to do so by a physician. Wash out mouth with water and keep person at rest. Seek immediate medical attention.

- · Information for doctor:
- Most important symptoms and effects, both acute and delayed No further relevant information available. • Indication of any immediate medical attention and special treatment needed Treat symptomatically.

#### 5 Fire-fighting measures

- · Extinguishing media
- Suitable extinguishing agents: Alcohol resistant foam Fire-extinguishing powder ABC powder
- · For safety reasons unsuitable extinguishing agents: Water with full jet
- · Special hazards arising from the substance or mixture

*In case of fire, the following can be released: Formaldehyde* 

Can form explosive gas-air mixtures.

Containers may explode due to pressure increase when container is exposed to extreme heat. Vapors may travel a considerable distance to a source of ignition and flash back along vapor trail.

- Advice for firefighters
- Protective equipment: Wear SCBA.

#### 6 Accidental release measures

Personal precautions, protective equipment and emergency procedures
Ensure adequate ventilation
Keep away from ignition sources
Use respiratory protective device against the effects of fumes/dust/aerosol.
Wear protective equipment. Keep unprotected persons away.

Environmental precautions:
Dilute with plenty of water.
Do not allow to enter sewers/ surface or ground water.
Methods and material for containment and cleaning up:
Absorb with liquid-binding material (sand, diatomite, acid binders, universal binders, sawdust).
Ensure adequate ventilation.

· Reference to other sections

- See Section 7 for information on safe handling.
- See Section 8 for information on personal protection equipment.
- See Section 13 for disposal information.

## 7 Handling and storage

#### · Handling:

- · Precautions for safe handling
- Keep away from heat and direct sunlight.
- Ensure good interior ventilation, especially at floor level. (Fumes are heavier than air). Prevent formation of aerosols.
- Information about protection against explosions and fires: Keep ignition sources away - Do not smoke. Protect from heat. Use explosion-proof apparatus / fittings and spark-proof tools.
- Protect against electrostatic charges.
- · Conditions for safe storage, including any incompatibilities
- · Storage:
- *Requirements to be met by storerooms and containers:* Store in inert atmosphere or keep well sealed to prevent the formation of peroxides and other oxidation products. Store in a cool location.
- Information about storage in one common storage facility: Do not store together with alkalis (caustic solutions). Do not store together with oxidizing and acidic materials.
- Further information about storage conditions: Keep container tightly sealed. Keep container well-sealed in cool, dry location. Protect from heat and direct sunlight.
   Specific end use(s) Positive radiation resist edge bead remover

#### 8 Exposure controls/personal protection

- Additional information about design of technical systems: No further data; see item 7.
- · Control parameters

· Components with limit values that require monitoring at the workplace:

Exposure controls	
Personal protective equipment:	
General protective and hygienic measures:	
Keep away from food and beverages.	
Immediately remove all soiled and contaminated clothing.	
Wash hands before breaks and at the end of work.	
Avoid contact with the eyes and skin.	
Do not inhale gases / fumes / aerosols.	
Respiratory equipment: Use suitable respiratory protective device in case of insufficient ventilation.	
Protection of hands:	
Selection of glove material on consideration of the penetration times, rates of diffusion and degradation	
The glove material has to be impermeable and resistant to the product/ the substance/ the preparation.	
Contact golve manufacturerer for break-through time.	
Material of gloves	
Butyl rubber, BR	
Nitrile rubber, NBR	
<b>Penetration time of glove material</b> Contact glove manufacture for break-through time.	
Eye protection:	
Tightly sealed goggles	

# 9 Physical and chemical properties

General Information Appearance:		
Form:	Liquid	
Color:	Clear to light yellow	
Odor:	Etheral	
Odor threshold:	Not determined.	
pH-value:	Not determined.	
Change in condition Melting point/Melting range: Boiling point/Boiling range:	Undetermined. 74-120 °C (165.2-248 °F)	
Flash point:	<7.5 °C (<45.5 °F)	
Flammability (solid, gaseous):	Not applicable.	
Ignition temperature:	270 °C (518 °F)	
Decomposition temperature:	Not determined.	
Auto igniting:	Product is not selfigniting.

#### 10 Stability and reactivity

- · Reactivity No further relevant information available.
- · Chemical stability Stable
- Thermal decomposition / conditions to be avoided: No decomposition if used according to specifications.
- · Possibility of hazardous reactions
- *Polymerization. Possible formation of peroxide.*
- · Conditions to avoid No further relevant information available.
- · Incompatible materials: Strong Oxidizing Agents, Strong Acids, Strong Bases
- Hazardous decomposition products:
- $\ Formaldehyde$

Carbon monoxide and carbon dioxide

107-9	107-98-2 1-methoxy-2-propanol		
	EC50 96 hr	23300 (daphnia magna)	
		>1000 (green algae)	
	LC50/96 h	20800 mg/l (Pimephales promelas)	

· Persistence and degradability The single components are biodegradable

· Behavior in environmental systems:

· Bioaccumulative potential

Due to the distribution coefficient n-octanol/water a worth-mentioning accumulation in organisms is not expected.

· Mobility in soil

*Component: Propylene glycol monomethyl ether, rapid dissipation in soil expected. Koc value between 1 and 50 indicating very high soil mobility.* 

· Additional ecological information:

· General notes:

Water hazard class 1 (Self-assessment): slightly hazardous for water

Do not allow undiluted product or large quantities of it to reach ground water, water course or sewage system.

#### 13 Disposal considerations

• Waste treatment methods

· Recommendation:

Must not be disposed of as regular garbage/trash. Do not allow product to reach sewage system. Disposal must be made in accordance with Federal, State, and Local regulations.

- · Uncleaned packagings:
- Recommendation: Disposal must be made in accordance with Federal, State, and Local regulations.
- · Recommended cleansing agent: Water, if necessary with cleansing agents.
